Clone Spray

For accelerating root and foliage growth in clones and seeds

Clone Spray contains a carefully balanced combination of macro and trace elements that are essential for clones and seedlings:

- Promotes vigorous root growth
- Promotes strong, healthy foliage
- Prevents wilting of stems and leaves
- Helps reduce the effects of transplant stress to enable transition-less growth through to late veg phase.
- Clone Spray contains its own "plant specific" wetting agent. This enables maximum leaf uptake of Clone Spray's ingredients. Also, unlike many wetters, Clone Spray's wetting agent is safe to use on sensitive plant tissue.
- Dosage: 25 ml/L (25ml /Qrt). Apply through to mid-veg.
- Available in: 1L // 5L // 20L // 200L // 1000L

Clone Spray produces explosive root growth. - P.B. Detroit Michigan

Revolutionary Organic Compounds

Over half of the FloraMax additives contain organics, but as analytical chemists, we have been able to isolate specific 'beneficial' organic molecules and incorporate them into our additives in a direct, purified, and potent form. This enables their concentrations to be optimized for maximum nutrient effect with no negative side-effects. The result is a range of products that produce unique and tangible results without reservoir foaming, build-ups, odors or blockages.

TESTIMONIES

“For Clone Spray we had amazing root eruption...It broke our previous rooting record by 3 days” (Purchasing manager from one of USA's largest chains)

“THIS IS THE BEST PRODUCT I HAVE EVER RECEIVED FROM A HYDRO SHOP. Not only does it do exactly what it says but there are so many different benefits in using this product...”
