

OrganaBud

Cleanest kelp additive on the market

The combination of unique ingredients used in OrganaBud create revolutionary stability and efficacy.

- Induces more bud sites, tighter internodes, more vibrant pistils and improved aroma.
- OrganaBud contains extracts of *Ascophyllum Nodosum* kelp.
- OrganaBud is completely soluble and resistant to causing blocked drippers, build-ups, foul odors or foaming in the nutrient reservoir.
- Is compatible with hydroponics, coco-fibre and soil systems including DWC, aeroponics and NFT.
- 3 year plus shelf-life helps ensure reliability.
- Dosage: 1-2ml/L (4-7.5ml/Gal) during veg and flower.
- Available in: 1L // 5L // 20L // 200L // 1000L

Revolutionary Organic Compounds

Over half of the FloraMax additives contain organics, but as analytical chemists, we have been able to isolate specific 'beneficial' organic molecules and incorporate them into our additives in a direct, purified, and potent form. This enables their concentrations to be optimized for maximum nutrient effect with no negative side-effects. The result is a range of products that produce unique and tangible results without reservoir foaming, build-ups, odors or blockages.

Organic additives are often notoriously messy (LEFT). OrganaBud runs extremely clean (RIGHT).

TESTIMONIES

“OrganaBud is providing more bud sites and tighter internodal spacing...more vibrant colours in the pistils, improved aroma and the impression of a fuller, more complete terpene profile...”

“OrganaBud is very clean in the reservoir and there are no bad odours. Other kelp products make a huge mess in the res, lines and drippers”
